

## Two Are Better Than One

*Reprinted from the Torre Argentina Cat Sanctuary  
and Doing Things for Animals*

- **By having two or more cats, you are able to enjoy the true social nature of cats and their relationship with each other.**
- **Cats who have a playmate tend to be more socially well-adjusted and avoid behavior problems like shyness, biting, hissing, being frightened and hiding in the company of people they don't know.**
- **Cats need stimulation during the day like humans. Studies have shown that some animals left alone most of the day in the house have brains that weigh up to 25% less than those that live in the street.**
- **They are less likely to ruin furniture out of boredom.**
- **If you must work long hours or travel for a couple of days, two or more cats keep each other company and are more tranquil during your absence.**
- **It's more likely that people bring back an adopted cat due to behavior problems when only one has been adopted rather than two.**
- **Your cat will remain more playful and youthful into his/her later years with a companion.**
- **Cats are much less likely to gain weight due to lack of movement, and to suffer related illnesses.**
- **The workload to care for two cats remains relatively the same.**
- **You don't need more space for a second cat!**

**Because....Two Are Better Than One!!**
